

## Open Call for Papers

### Special Issue on “Immigration in OECD Countries” at *Review of International Economics*

**Paper Submission Deadline: March 1st, 2021**

The Review of International Economics is having an open call for papers for a special issue that will address economic questions related to immigration in OECD countries. Submitted papers are expected to make a significant contribution to understanding the determinants and consequences of immigration for receiving economies. While new submissions are most welcome, this call follows from the 10th annual OECD-CEPII-LISER Conference on “Immigration in OECD Countries”, organized this year online by the Migration Division of the OECD on 7-8 December 2020.

All submissions will go through the RIE’s regular peer review process. Giovanni Facchini (Nottingham; [Giovanni.Facchini@nottingham.ac.uk](mailto:Giovanni.Facchini@nottingham.ac.uk)) and Hillel Rapoport (Paris School of Economics and CEPII; [hillel.rapoport@psemail.eu](mailto:hillel.rapoport@psemail.eu)) will co-edit the special issue, which is expected to be published in 2022.

**Submission Guidelines:** all submissions to the journal must be submitted online at <http://mc.manuscriptcentral.com/roie>. Full instructions and support are available on the site and a user ID and password can be obtained on the first visit. If you require assistance then click the Get Help Now link which appears at the top right of every ScholarOne Manuscripts page. Please read the general guidelines for manuscript submission (e.g., papers must be in English, with original content not submitted elsewhere, page limits, data sharing and single/double-blind policies). **At the submission stage**, the authors must choose their article type as special issue type after which they must answer to the question if this is a special issue article type as “yes”; then only will they be able to fill up the special issue title in the Step 5 of the submission. It is important that the authors do not miss out this step. Papers will be flagged to the SI only if the authors have given a special issue title to differentiate them from regular papers.
