

JUNIOR WORKSHOP ON THE ECONOMICS OF MIGRATION

June 15 & 16, 2023

Institut Convergences Migrations

Salle 0.04 - RDC bâtiment Recherche Nord
Campus Condorcet, 14 Cours des Humanités, Aubervilliers

.....

The Junior Workshop on the Economics of Migration is a joint initiative of CERDI, PSE, LISER, the University of Luxembourg, Universidad Carlos III, CEPII, and the Institut Convergences Migration (ICM).

It offers Ph.D. students and early-stage researchers (post-docs and assistant professors with less than 3 years of experience) an opportunity to share their work in a constructive environment, as well as to exchange the results of recent research in different fields of migration economics.

This workshop follows the spirit of the online webinar series on the economics of migration, an initiative that was launched in April 2020 to provide a platform to economists working on migration to present their work virtually.

ABOUT INSTITUT CONVERGENCES MIGRATIONS

There are ten « Convergences Institutes » (collaborative institutes) in France that were created in 2016 and 2017 on behalf of an international jury leading the 2nd Programme des Investissements d'Avenir. The goal is to gather scientific research by gathering 600 researchers from various institutions to combine disciplines and create an original training program. The French Collaborative Institute on Migration (CI Migration) is the only program that brings together social sciences, human sciences and health sciences. Within the CI Migration, 5 specialised thematic departments and a department dedicated to the academic course (Master's Degree on Migrations) have been established.

The CI Migration organises joint research activities (such as seminars, scientific events, publishing, etc). Additionally, it finances arising research projects as well as young researchers' work. In 2020, a Master's degree program has been put in place by the CI Migrations to combine courses in human sciences, social sciences and life sciences. An important goal for the Institute is to encourage and promote dialogues between science and society with the two following approaches : to analyse news events through its online revue *De facto* and to establish a partnership with local officials (teachers, associations, health care practitioners, social services workers, etc).
